4	D	27 06 24.61N, 075 41 15.07E

NOTE: 1. Altitudes shown are based on QNH.
2. Only signficant spot elevations are shown
3. ATC Surveillance Minimum Altitudes are established within 25NM of ARP(264927N 0754809E)
4. Chart may only be used for cross-checking of altitude assigned while the aircraft is identified.

DRG NO. AAI - RVPC/18/26-10-2018

Radio Communication Failure Procedure:

When providing navigational guidance to aircraft based on the use of an air traffic services surveillance system for pilot interpreted final approach aid, following radio communication failure procedure shall be applicable-

1. If radio communication failure takes place prior to interception of final approach track, aircraft shall maintain the last assigned altitude or 3800Ft whichever is higher and proceed to JJP VOR via shortest route to join the holding procedure.After joining the holding procedure aircraft shall carryout the instrument approach procedure for which navigational guidance was provided.
2. If radio communication failure occurs after interception of the final approach track, aircraft should continue the approach and land if visual or carryout the missed approach and join the JJP VOR holding at 3800Ft. After joining the holding procedure aircraft shall carryout the instrument approach procedure for which navigational guidance was provided.
